Forms & Databases

Professional Profile

AI Automation & AI Agent Developer with approximately one year of hands-on experience building business workflows. Connects AI agents, databases, APIs and communication tools for lead management and appointment booking, focusing on HVAC and other home-service businesses.

Experience

AI Automation & AI Agent Developer

Independent Projects / Freelance | 2025 – Present

- Design end-to-end AI automation workflows that connect customer interactions with business operations.
- Build automated lead capture, qualification, appointment booking and follow-up workflows.
- Develop AI-agent workflows for customer interactions and route information into CRM and operational systems.
- Integrate databases, APIs, webhooks, forms, calendars and communication tools.
- Address booking and lead-management needs for HVAC, plumbing, roofing and other home-service businesses.

Featured Project

AI-Powered HVAC Appointment & Lead Management System

Independent project / hands-on experience

- Built lead capture, customer-data normalization, and automated lead and appointment creation in Supabase.
- Centralized availability checks, date and time validation, duplicate-booking prevention and Google Calendar event creation.
- Designed email, SMS and phone routing by contact preference, with booking confirmations and follow-up workflows.
- Structured AI-assisted appointment handling and support for AI calling agents across communication channels.

Tools: n8n, Supabase, Google Calendar, APIs, webhooks, forms, AI agents and communication integrations.
